

## How to update your product's firmware in Windows using Epson Software Updater

If you do not have the **Epson Software Updater** utility, you can download it at <a href="http://www.epson.com/Support/wa00590">http://www.epson.com/Support/wa00590</a>

1. Do one of the following to open Epson Software Updater:

Windows 10: Click the Start icon and select Epson Software > Epson Software Updater. Windows 8.x: Navigate to the Apps screen and select Epson Software > Epson Software Updater.

Windows (other versions): Click the Start icon and select All Programs or Programs > Epson Software > Epson Software Updater.

- 2. Select your model from the list, if necessary.
- 3. Select **Firmware Updater** by checking the box next to it. (Epson recommends installing all Essential Product Updates.)
- 4. Click the **Install item(s)** button.

## Caution:

- Wait for the firmware update to complete before using the printer.
- Do not unplug the power cable or turn off your printer while firmware is updating. If your printer has an LCD screen, do not turn the printer off even if the screen turns blue or turns off.
- The printer will restart on its own once the update has completed. If your printer has an LCD screen, it will show the home screen after restarting.

8. When the firmware update is complete, click the **Finish** button.
